## INTRODUCTION:

Experts in development and national planners in the third world are in agreement that the agricultural sector is the key to increase prosperity and enhance standard of living of most societies all over the world. The developing countries have huge resources, natural and human, which remain very incompletely utilized and which, if properly harnessed to the goals of development, can not only insure that the people of the world are better fed, but can also make a surplus production which can serve as a foundation for further industrialization.

Egypt, as one of the oldest agricultural societies in the world and a country which has shouldered a historic responsibility for sharing its knowledge and expertise in many fields with its sisterly countries, has a special role to play in facilitating communication among the developing countries in particular with regard to strategies of economic development in the agricultural sector.

Since the pharaonic era, nations of the Middle East and Africa have been eager to take advantage of the Egyptian discoveries and expertise, accordingly, Egypt took the lead to assist by sending out its experts to the four corners of the globe.

The Egyptian universities and agricultural research institutes opened their doors to students from all over the world providing them with specialized training in their respective fields. This historic commitment to share knowledge and skills with the population of sisterly countries has been further extended and formalized through the establishment of The Egyptian International Centre for Agriculture (EICA) as a foundation of the Ministry of Agriculture.

## OBJECTIVES

It is worth mentioning that the objectives of the centre are not only to train in - service agronomists from Africa, Asia,

Auditorium of the centre

Participants at the lecture hall

Latin America and Eastern Europe in various fields of agriculture, but also to bring together agricultural talents from all countries for a first-hand understanding and appreciation of each other's problems and help evolve, by pooling of knowledge, new techniques in agricultural development adapted to the conditions of these countries.

In conducting the training courses, EICA staff will collaborate with personnel from the Agricultural Research Center and its affiliated sixteen research institutes together with their ten central laboratories and their forty nine

research station, beside experts from the Ministry of Agriculture, the Ministry of Irrigation and Water Resources, the Ministry of Planning, Universities and The National Research Centre.

Training courses are conducted by senior agricultural specialists, covering both the theoretical and practical training. Practical work includes demonstration, laboratory work, field trips, study tours, case studies and workshops. Course duration varies depending on the subject matter. The instruction language is English with simultaneous interpretation to French and Spanish.

**Simultaneous interpretation**

Upon the termination of each course the centre awards a certificate of achievement for active participation and attendance level of at least 90% of the course duration.

**Distribution of Certificates**

**Ambassadors attending the closing ceremony**
