- Concept such as propounding a new theory or describing pathways and mechanisms of a process. In case of social sciences, the concept may include new approaches/tools such as total factor productivity, social business and meta-evaluation.
- Process such as development and description of steps/components of a process that explain the total mechanism of operation. These may also include development of new extension methodologies, methods of conservation agriculture, development of innovative methodologies for research prioritization and technology impact assessment and applications of new concepts.
Marks should be allotted based on credible evidence either published in journal with at least 15 number of citations or included in a reputed text book or referred to in important planning and policy documents. Complete reference of the published papers or books or planning and policy documents should be provided.

Each concept and process scores 1 mark.

Since difference between concept and process is thin, double counting should be avoided.
