

## Cotton Interlined Sleeping Bags for Better Comfort

Defence personnel, Central & State Reserve Police force, Anti-Naxalite Task Force, Trekkers need sleeping bags for protection while working in forest area from external environmental elements, insect / reptile bites etc. during outdoor stays. Even farmers need it while working at night on their farms.

At present sleeping bags are manufactured using synthetic materials especially Nylon, Polyester and Polypropylene and mostly imported.

M/s Shree Agro Invent-Tech Pvt. Ltd, Mumbai which is a start-up incubated at ICAR-CIRCOT has developed this innovative sleeping bag with the functional finishing technology licensed from CIRCOT to offer an import substitute with more comfort.

### Product Features

- Inner layer of 100% cotton for better comfort and to avoid static charge generation.
- High abrasive resistant, light weight outer layer of Polyester fabric
- Anti-bacterial inner cotton layer to avoid odour generation due to sweating.
- Sleeping Bag has pocket to place mosquito repellent pouch as well

**Note:** These sleeping bags can be modified to protect user in low temperature conditions.
